

# **HAD ENOUGH** of the Red, White and Blue?

**S E C E D E**

*Try Red, White and Green!* The New England Independence Campaign is committed to restoring democracy and participatory government. No government should produce laws that flagrantly undo civil liberties and disregard the system of checks and balances. New England is a bastion of hope in a land that no longer values liberty, equality, or smart governance.

## **1. EQUAL RIGHTS FOR ALL.**

The New England Independence Campaign believes in human rights, personal freedom, liberty, a clean/green environment, transparency, accountability, and respect for all individuals as equal, regardless of religion, race, ethnicity, gender, or personal belief. **No excuses, no loopholes.**

## **2. NO TYRANTS, NO KINGS.**

The national government should defer to the state and local governments more often. Ordinary people trust and work together with the government more often when the power is held at the state or municipal level. "All politics is local."

## **3. PEACE AND DIPLOMACY.**

Nobody wins in warfare except those who work in the military-industrial complex, and they certainly avoid the fighting themselves. A New England Republic will promote neutrality and not waste taxpayer money on foreign conflict.

## **4. END GOVERNMENT SPYING ON ITS PEOPLE.**

We believe that the people have the right to privacy, without the government watching their every move. The Patriot Act and other measures that destroy that right should be swiftly abandoned.

## **5. PUBLIC ACCOUNTABILITY.**

The New England Independence Campaign believes in increased transparency for elected officials and putting a stop to outside interference in local elections, including heavy interference from wealthy interest groups.

## **6. LAND BACK.**

With respect to the rights of Indigenous peoples and their self-determination, and we promise to work with New England tribes to chart a path forward for the harm inflicted through land dispossession and cultural repression.
